Keep the good things going.

A practical checklist for thoughtful everyday care.

Keep it clean

Use a soft cloth for routine cleaning. Avoid abrasive materials. Follow the supplied care instructions for the particular product before using any cleaning solution.

Store it thoughtfully

Return accessories to their case or a consistent storage place. Let items dry fully before storage and avoid prolonged direct heat or sunlight.

Know your product

Check the product label and model-specific instructions before charging, washing, connecting or adjusting your item. Different products need different kinds of care.

Ask when you need to

Keep your order number and product name close. A clear photo and a short description can help support understand a product question. Never include account passwords or full payment card details.
